

# Top 25 LEGO Investment Picks

**June 2026**

Daily LEGO investment analysis for Switzerland  
Free monthly report from Swiss Brix

[swissbrix.com](https://swissbrix.com)

# How we pick

Swiss Brix analyzes 5,000+ LEGO sets daily, combining Brickset catalog data with Brickeconomy market values and forecasts. Each set gets a Buy Score from six factors:

1. MSRP discount vs. current Swiss retail price
2. Time since release / proximity to retirement
3. Spread between MSRP and current secondary market value
4. Brickeconomy 2-year forecast
5. 12-month price momentum
6. Theme premium (e.g. UCS Star Wars and Modular Buildings score higher)

The Buy Score (0-100) maps to a letter grade for quick reading:

<b>A+ / A</b>	Exceptional. Top of the heap.
<b>A- / B+</b>	Strong picks worth acting on.
<b>B / B-</b>	Decent. Watch for entry points.
<b>C+ / C</b>	Hold or skip — better picks elsewhere.
<b>D / F</b>	Avoid for investment.

## Pricing context

For sets still in production, we use MSRP as the buy-in price.  
For retired sets, we use current secondary market value (you can't buy at MSRP anymore).  
All prices in Swiss Francs (CHF).

This document is updated monthly. Sets retire, prices move — bookmark [swissbrix.com](https://swissbrix.com) for the daily updated rankings.
